Universal Remote Car Keys and Universal Remote Cable

THE EASIEST SOLUTION FOR DUPLICATING CAR REMOTES

The Silca **Universal** Remote Car Keys are a range of quality remotes that, once programmed, duplicate the functions of the original vehicle key. They come in four different designs suitable for the most popular brands worldwide, feature three push buttons for lock, unlock and boot release, and incorporate a Silca quality retractable flip blade.

The Silca **Universal** Remote Cable connects the remote to the smartphone to pre-set a new remote in just a few seconds. You just need to select the vehicle model from MySilca SRP app and the cable enables pre-set data to be written onto the remote key.

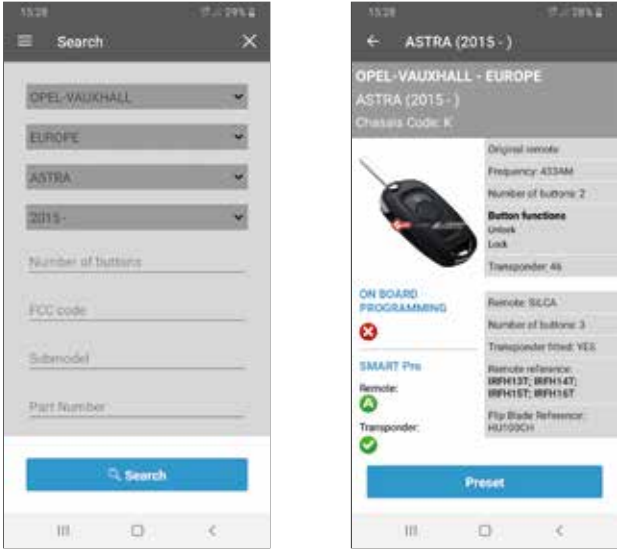

UNIQUE MYSILCA SRP APP

MySilca SRP app is the unique, user-friendly app that guides you step-by-step through all the pre-setting and programming operations of a Universal Remote Car Key.

MAIN FUNCTIONS

First it helps you to identify the vehicle that needs to be pre-set. You select from a number of characteristics, including make, model, year and chassis code of the vehicle.

The software shows the right Universal Remote Car Key reference, transponder and Silca CH key blade to use, and provides relevant information such as the remote frequency, the number and function of buttons.

KEY BENEFITS

■ Proven, popular key designs

The Silca Universal Remote Car Keys' designs are inspired by original keys of internationally recognizable brands, providing a 'like-original' solution at a much more affordable price compared to authorized car dealers. You can choose from 5 different designs.

■ Robust, quality Silca blades

The Silca Universal Remote Car Keys are made with long-lasting components, feature a robust flip mechanism and are compatible with a new, wide range of Silca quality CH blades. We suggest using the Silca pin fixing tool AVH4000 for easily blocking the blade to the remote. The pins are supplied with the remote.

■ Wide vehicle coverage from a low inventory

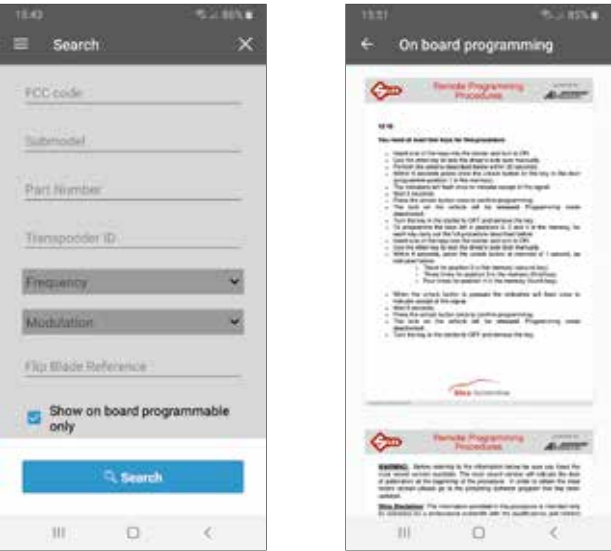

Hundreds of vehicle models can be programmed from the range key variants, combined with the special CH blades. Each reference can come with or without transponder, depending on its applications.

■ Immediate, plug'n'play solution

The Silca Universal Remote Car Key guarantees a prompt and immediate service to the customer: the smartphone is virtually always with you, right in your pocket. You just need to download the free MySilca SRP app and connect the cable.

■ Quick and easy to pre-set

The remote is pre-set automatically once you connect it to the smartphone via the Universal Remote Cable and select the relevant vehicle model in the user-friendly MySilca SRP app.

PROGRAM WITH SMART PRO OR MANUALLY

The software allows you to filter the models that can be programmed manually with the car manufacturer's manual on-board procedures, supporting customers who are equipped only with cloning devices. These procedures are available in English, Arabic, Czech, Dutch, Finnish, French, German, Greek, Hebrew, Italian, Japanese, Korean, Polish, Portuguese, Romanian, Russian, Spanish, and Turkish, and are constantly updated.

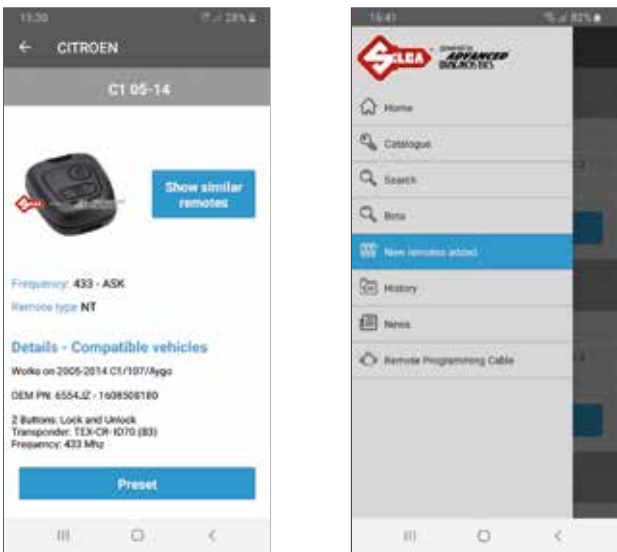

The app provides precise information on how to program the remote also when using the Smart Pro.

MAIN CATALOGUE AND THE BETA VERSION

The range of supported vehicles is continually updated and includes all the most popular models. The full application list is available in the app, complete with photos of original remotes and full technical details. You can also search in the Beta version of the app, which comprises thousands of additional models.

OTHER FUNCTIONS

With MySilca SRP app, you can also check the latest remotes added to the catalogue, the News section with firmware update notifications, and the History function with the list of all your programming routines.

HOW IT WORKS

With the Silca **Universal** Remote Car Key Solution duplicating original vehicle keys and programming remotes is easier than ever before.

MYSILCA SRP APP

MySilca SRP is Silca exclusive, free app to operate the Universal Remote Car Key Solution. It is compatible with Android operated smartphones that support the OTG technology (USB On-The-Go)*. This solution is not available for iOs devices. The app is available in English, German, French, Italian, Portuguese, Spanish and Dutch.

If you have already installed the app on your smartphone, update it to version 1.5.

* Virtually all the smartphones produced from 2013-2014 support the OTG technology

CE CERTIFIED

The Universal Remote Car Key and the Universal Remote Cable have been designed and manufactured in conformity with CE mark European standards.
